

Subject: Urgent Complaint Regarding Irregular Water Supply and Contaminated Water in Odisha

To:

The Executive Engineer,
Public Health Engineering Organisation (PHEO),
Water Supply Department,
Government of Odisha.

Respected Sir/Madam,

I am a resident of [Your Exact Locality, e.g., Saheed Nagar, Bhubaneswar], Odisha, and I am writing to lodge a **formal complaint** regarding the **irregular and insufficient water supply** in our area for the past [X days/weeks].

We are experiencing frequent **interruptions in water supply**, especially during the morning hours. On the rare occasions when water is available, it is **muddy, discolored**, and gives off a **foul odor**, making it **unsafe for drinking, cooking, and other household purposes**. These issues are posing **serious health risks** and have affected the **daily lives of residents**, including students, working professionals, and senior citizens.

Despite several complaints made at the **local ward office**, no **corrective action** has been taken so far. We request the **Public Health Engineering Organisation (PHEO)** and the concerned **water supply authorities** to:

1. **Conduct a thorough inspection** of the water pipelines for any leakage or contamination sources
2. **Restore regular and adequate water supply** at fixed timings
3. **Ensure the water being supplied is clean, treated, and safe for consumption**

This is a matter of **public health and sanitation**, and we urge you to take **immediate remedial action** to address this grievance.

Thank you for your prompt response and cooperation.

Yours faithfully,

Odisha –
